

Amendment to the Claims:

This listing of claims will replace all prior versions and listings of the claims in the application:

Claims 1 – 10 (canceled)

- 5 Claim 11 (new) A portable combination thermal container and multi-media player, comprising:

a rectangular-shaped container having a pair of opposed sidewalls, a floor, and a front panel with the container internally divided by a partition wall thereby creating a larger cavity and a smaller cavity both of which are enclosed by the container;

- 10 a pair of lid portions pivotally mounted to the container with each lid portion adapted for covering and uncovering one cavity and each lid portion usable as a seat when the lid portions are pivoted for covering the respective cavities;

a multi-media player including a radio, a cassette, and a CD player mounted to the front panel;

- 15 a pair of mid-range speakers mounted to the front panel with one speaker mounted on each side of the multi-media player and electrically interconnected to the multi-media player;

a drain cap mounted on the sidewall adjacent the larger cavity for allowing the discharge of any fluid that has accumulated in the larger cavity;

- 20 an antenna mounted to the sidewall adjacent the larger cavity for receiving radio signals and electrically interconnected to the multi-media player;

a first aid kit removably mountable to the sidewall adjacent the smaller cavity for treating medical conditions and emergencies;

a bottle cap opener mounted to the sidewall adjacent the smaller cavity for opening a bottle that has a press-fit cap;

a pair of handles with one handle pivotally mounted to one sidewall and the other handle pivotally mounted to the other sidewall so that the container can be picked up and moved from location to location;

a plurality of casters mounted subjacent the floor of the container and at each corner of the container for allowing the rolling transportable movement of the container upon a ground surface; and

a plurality of holders mounted to the sidewall adjacent the larger cavity for holding utensils and cups and for allowing their removal therefrom for use by the individuals.

Claim 12 (new) The portable combination thermal container and multi-media player of claim 11 wherein the lid portions are capable of pivotal movement at least 180 degrees so that when the lid portions are fully pivoted 180 degrees rearward to uncover the cavities the lid portions can receive and support food and beverage items thereon.
